Dear Parents/Guardians

Re: Year 7 Mathematics classes

The Mathematics team has been delighted to welcome Year 7 students to SNHS and we have really enjoyed getting to know them. The first few weeks of term have provided us with the opportunity to assess the students' understanding of key mathematical concepts as well as identify any gaps in their mathematical knowledge and skills.

We are now ready to re-group the students into classes with their peers who need to improve in similar areas of mathematics so that we can provide appropriate challenge and support for each student. We aim to ensure that each individual is best placed for achieving the most positive outcome in our subject. This means your child might be directed to a new classroom and teacher later this week. The numerical label of the group as it appears on the timetable does not correspond to a ranking of sets but is simply a requirement for the timetable to run smoothly.

These groupings are reviewed on a regular basis as we continually assess how much progress the students have made with their mathematics. Unless further changes are required throughout the year the likelihood is that your child will continue with their current or new Mathematics teacher for the rest of this academic year.

If your child is unclear about who their Mathematics teacher is then please ask them to approach their form tutor for confirmation. You should also be able to view this information via ePraise.

I will be available at our Y7 Meet the Tutor event on Tuesday 1st October if you wish to ask any questions or discuss your child's progress in Maths.

Yours faithfully

Miss A R Lewis

Subject Leader for Mathematics
